

## **Declaration of Conformity** **Acc. to REACH Regulation**

REACH is the Regulation on Registration, Evaluation, Authorization and Restriction of Chemicals. The main aims of REACH are to ensure a high level of protection of human health and the environment from the risks that can be posed by chemicals, the promotion of alternative test methods, the free circulation of substances on the internal market and enhancing competitiveness and innovation.

One of the main elements of REACH is registration of substances, which obliges manufacturers and importers from outside the EU of substances, to provide registration information to the Chemicals Agency, information which contains a chemical safety assessment.

SOMAS is a manufacturer of articles like valves, actuators and positioners. SOMAS is also a purchaser of articles and preparations. Preparations are purchased from inside the EU, and are used as intended in the Safety Data Sheets. SOMAS does not manufacture any substances or preparations.

SOMAS have communicated the REACH obligations to all its suppliers. All registrations are made and will be made up the supply chain.

The candidate list of Substances of Very high Concern (SVHC-) is continuously monitored, and SOMAS will inform a purchaser of an article if more than 0.1% of a substance in the article appears on the list.

SOMAS by that means ensure conformity with the regulation, and ongoing deliveries, in respect of the REACH.
