## Butterfly valve for marine cargo systems MTVC/MTVCL

Edition: 2024-05

- Advanced triple eccentric design
- Designed for manual and remote operated applications
- Designed for applications up to 150 °C (302 °F)
- Tightness class in accordance with EN 60534-4 Class V, as standard
- Y-seat made of stainless steel

### Option

- PTFE-seat

**Type MTVC:**

**Wafer design**

**Type MTVCL:**

**Lugged design**

**Nominal pressure:**

**PN 10-25, Class 150**

**Nominal size:**

**DN 80-350, NPS 3-14**

# Product Information

Somas butterfly valves type MTVC and MTVCL in this datasheet are intended for manual and remote operations. The valves are intended for marine cargo systems.

The butterfly valve type MTVC is wafer type for mounting between flanges. The valve can also be available in lugged design (MTVCL).

The valves are of advanced triple eccentric design. This means that Somas butterfly valves have a curved sealing-area. Through a specific shape of the shaft a Y-seat made out of stainless steel can be used, which means excellent tightness is offered ( A "standard" triple eccentric design is based on a disc-shape based on a cone, the disc sealing area becomes straight).

The Y-seat remains unaffected by high flow velocities and temperature. A good valve function is achieved even on difficult applications.

The valves are delivered ready for installation and operation.

Manually operated valves are delivered with a lever (lever is only sold for valves with soft seats and for the size of DN 80 - 125) or gear unit.

Remotely operated valves are delivered with hydraulic actuators.

## Option

### PTFE - seat

- Offers higher tightness class
- Less resistant to wearing

## Tightness class

The valves tightness varies in relation to the selected material of the seat ring.

Standard leakage class	Optional leakage class
<b>EN 60534-4</b>	<b>EN 60534-4</b>
PTFE - Class V	PTFE Class VI ( $\leq$ DN400)
Metal Class V	
	<b>EN 12266-1</b>
	PTFE - Rate B
	PTFE Rate C
	Metal Rate D

## Necessary torque

Below results applicable at 20 °C

Valve DN	Shaft (mm) dia.	Closing torque (Nm)		Max allowed
		Min. req $\Delta p \leq 10$ (bar)	$\Delta p > 10$ (bar)	
80	20	100	120	150
100	20	120	165	220
125	20	165	180	220
150	25	200	250	300
200	25	250	290	350
250	30	400	500	600
300	35	500	620	750
350	40	800	1000	1200

12	300	324	378	384	400
14	350	356	438	444	457

For mounting between flanges according to PN 10-25, the inside gasket diameter should not exceed the dimensions specified in the standard EN 1514-1

**Recommendation: Use nominal diameter as inside diameter.**

## Flange standard

Somas butterfly valve type MTV in this data sheet is of wafer type for mounting between flanges PN10-25/Class 150.

The valve can also be delivered in lugged design.

The valve can be drilled for mounting between flanges according to ASME B16.5:2003. When ordering, please state the pressure rating of the counter flanges. See valve specification system, code 13.

## Seat design

The valves with a nominal size between DN80-350 have a metal seat according to code D (Y-seat).

PTFE-seats are available as an option to metal seats.

## Ordering

State desired valve according to the valve specification system below as well as type of actuator, positioner and accessories.

## Actuators, gears and accessories

The valves can be fitted with gear units,, levers or hydraulic actuators in accordance with the selection tables in this data sheet.

The gear material and painting is customized for on-deck applications (BSK-99 Corrosion Class C5 M). See also data sheet Ti-918 for painting procedure for on-deck applications.

The valves will be delivered as tested units ready for installation.

## Additional information

Use gaskets with the correct inside diameter to ensure that pressure is applied on the cover plate.
